**Constantine Stephanidis**

General Chair HCII 2017

HCI International is the worldwide renowned international forum for the dissemination and exchange of up-to-date scientific information on theoretical, generic and applied areas of Human-Computer Interaction.

Like its predecessor conferences, HCI International 2017 (HCII 2017) promises to be an unforgettable cluster of high quality international scientific events, and an ideal occasion to come to contact with the rapidly evolving ICT market in the world. HCII 2017 and the Affiliated Conferences/Thematic Areas explore a wide variety of new hot topics which reflect and contribute to a paradigm shift towards ubiquitous interaction, intelligent environments and interactive technologies supporting virtually any aspect of human life and activities in a global and social perspective.

The 30-volume Conference Proceedings are published by Springer in the Lecture Notes in Computer Science (LNCS), Lecture Notes in Artificial Intelligence (LNAI) and Communications in Computer and Information Science (CCIS) series, and are available on-line through the SpringerLink Digital Library (<http://www.springer.com/lncs> and <http://www.springer.com/series/7899>), readily accessible by all subscribing libraries around the world. All volumes of the Proceedings in PDF format are also included in a USB Drive provided in your registration bag. They are also available for sale from Springer in soft cover print format.

An impressive number of about 1800 individuals from 70 countries are participating in this truly international in scope event,

where the work of the world's foremost leaders in the field is presented.

We are privileged that Dr. Ben Shneiderman, a Distinguished University Professor in the Department of Computer Science, Founding Director (1983-2000) of the Human-Computer Interaction Laboratory, and a Member of the UM Institute for Advanced Computer Studies (UMIACS) at the University of Maryland, USA, has joined us as the keynote speaker at the opening plenary session.

HCII 2017 Keynote Speaker and worldwide renowned HCI pioneer, Ben Shneiderman, has enthusiastically accepted the conference invitation to hold two Mentoring Sessions for small groups of PhD students during the Conference. Prof. Shneiderman will discuss how to achieve high impact results for your research, based on the ideas in his book "The New ABCs of Research: Achieving Breakthrough Collaborations".

Sixteen awards will be conferred during the opening plenary session. The awards, in the form of a plaque and a certificate, will be presented to the author(s) of the Best Paper of each Affiliated Conference/Thematic Area, and of the Best Poster Extended Abstract.

I would like to thank each and every one of you for your valuable contribution towards the success of this Conference, and to wish you a professionally rewarding and socially enjoyable stay in Vancouver.

Constantine Stephanidis

## ***The New ABCs of Research: Grand Challenges for HCI***

### ***Ben Shneiderman***

Professor: Computer Science, UMIACS

Founding Director: Human Computer Interaction Lab (1983-2000)

Affiliate Professor: Institute for Systems Research

Affiliate Professor: College of Information Studies - Maryland's iSchool  
University of Maryland, USA

### **Abstract**

Solving the immense problems of the 21st century will require ambitious research teams that are skilled at producing practical solutions and foundational theories simultaneously – that is the **ABC Principle: Applied & Basic Combined**. Then these research teams can deliver high-impact outcomes by applying the **SED Principle: Blend Science, Engineering and Design Thinking**, which encourages use of the methods from all three disciplines. These guiding principles (ABC & SED) could drive HCI research to become the key transformational discipline for the 21st century by accelerating discovery and innovation.
